Our research seminar with Denis Grégoire had to be canceled due to the restrictions that come along with the Corona Virus. However, we are happy to announce that we offer a different format:

We are organizing a Digital Paper Development Workshop (DPDW) about research questions concerning entrepreneurial cognition (e.g., How do mental models and processes influence entrepreneurial actions? Does shared team cognition lead to more successful outcomes?) on 23rd April, 4-6 pm (CET).

• Up to 6 slots for working papers
• Papers are feedbacked by two co-presenters from the group of participants.
• Each session consists of:
  – 5 min introduction to the background of the paper by the author
  – 15 min feedback by the co-presenters and
  – 10 min discussion with the whole group.

DIGITAL PAPER DEVELOPMENT WORKSHOP
ENTREPRENEURIAL COGNITION
